Pennsylvania State Fire Academy

The Pa. State Fire Academy, located in Lewistown, offers a wide variety of advanced level training programs. Some of their offerings are listed here and any of the Academy on the Road or Alternative Energy programs can be provided at the Local Level. If you have questions on any of these programs, feel free to contact our Academy Staff.

RESIDENT TRAINING: 'Next Level' training is provided each year to emergency responders from across the State. Residential 'live burns', high rise scenarios, Officer Command, and an 'instructor pathway' curriculum to further bolster the next generation of fire service instructors.

ACADEMY ON THE ROAD: Offering 'Next Level' training at a more localized level, the AOTR is a very busy program. The Flashover Simulator offers real life hands on training to interior firefighters. This training is a live fire event and will have the ultimate impact of visual recognition of a dangerous situation, and hopefully save the lives of interior firefighters.

ALTERNATIVE ENERGY EMERGENCY RESPONSE: This department within the Academy is funded through Act 13 and offers specialized 'On The Road' training to not only well drilling counties, but also throughout the Commonwealth involving vehicles that use 'Alternative Energy' for transportation.
